

SOFTWARE DEVELOPMENT

THE DIPLOMA

The Software Developer program prepares students for an entry-level career in software/web development.

WHAT YOU'LL LEARN

- How to create dynamic, full-stack web applications using front-end, back-end, and database development.
- How to use Responsive Design to produce mobile friendly applications (iOS/Android).
- How to work with an Agile software development team (used in most workplaces today).

WHAT YOU'LL GET

- Practical skills to develop a fully functioning web application that includes front-end, back-end and data base components.
- Receive job placement assistance including resume building, interview training and help identify relevant positions in related fields.
- Access to create a virtual profile on our exclusive employment networking platform.
- Hands-on experience.

THE WOZ U EDGE

QUALITY CONTENT

- Created by Industry Experts & Employers
- Curriculum created by industry experts for employers and vetted by Department of Education accreditors for rigor and outcomes with instructors meeting college level standards.

CAREER SERVICES

- Resume Building
- Interview Training
- Job Placement Assistant
- Electronic Career Profile
- Digital Badges
- Employer/Alumni
- Connections

IN-PERSON COACH

- Admissions coach
- Financial Aid Coach
- Instructors
- Career Services Coach
- Assigned Mentor
- Student Ambassadors

* FOR THOSE WHO QUALIFY

COURSE OUTLINE

SWD100	Coding from Scratch Learn foundations of HTML, CSS, and JavaScript and how to record and share progress with Git
SWD101	Front End Foundations Create interactive websites with dynamic data through the use of AJAX, jQuery, and DOM Manipulation
SWD102	Programming Foundations Understand programming principles of chosen career path. Learn language-specific concepts in Java, C#, or JavaScript
SWD103	Front End Frameworks Learn front-end best practices and Single Page Web Applications (SPA) with either React or Angular frameworks
SWD104	Back End Foundations Create server-side web apps and services with choice of Express, ASP .NET, or Spring
SWD105	Database Foundations Learn how to design, create, and manipulate databases. Students will work with both relational (SQL) and non-relational databases
SWD106	Mobile Apps & Responsive Design Responsive Design principles and create a mobile-first experience to be used on mobile apps (iOS/Android)
SWD107	Agile Project Management & Career Skills Manage software projects & Agile teams, learn roles and responsibilities, as well as the Software Development Life-cycle (SDLC)
SWD108	Deployment & Web Security Understand the process and benefits of deploying a web application to a cloud hosting provider
SWD109	Group Project Build a full-stack application as an Agile Project Team followed by a presentation in front of family, friends, and employers

CAREER SKILL BADGES
